

# Corridor Aesthetics Analysis Zones

Iowa Department of Transportation

Illinois Department of Transportation

Corridor Aesthetic Analysis Zones were identified within the project corridor. These zones are defined by viewsheds, land use and topography:

- Viewsheds
  - Viewsheds were determined by the analysis of the topographic map, aerial photographs and by driving along the corridor.
- Current land use within the corridor
  - Land use was determined by land use maps provided by the municipalities, a visual study of the aerial photographs and by driving the corridor
- Physical attributes of the corridor
  - Physical attributes were determined by aerial photographs, driving the corridor and researching maps of the area.
